POSTOPERATIVE PAIN AND GABAPENTIN

Yavuz Orak
Postoperative Pain and
Gabapentin

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Combined spinal-epidural anesthesia (CSEA) is a technique, which is frequently preferred in lower extremity surgery. It has been reported that preoperative administration of gabapentin, approved for neuropathic and chronic pains, also reduces postoperative pain. In this study, the effect of preoperative administration of gabapentin on postoperative pain in patients who had CSEA during lower extremity surgery is investigated. The demographic characteristics, hemodynamic parameters, duration of surgery, and sedation scores of the groups...
