Why does she always want to talk about the relationship? Why can t he see that something is bothering her?* But perhaps the biggest questions Why Men Never Remember and Women Never Forget resolves are: Why is it so hard for men and women to understand each other . . . and what can we do about it? According to Dr. Marianne Legato, an internationally recognized expert in gender-specific medicine, male and female brains are chemically and structurally different. And scientists are now finding out how these differences cause us to approach problems and experience the world in such dissimilar ways. So how do we bridge this physiological gap?
