

## Multi-Class Classification for Identifying JPEG Steganography Embedding Methods (Paperback)

Filesize: 8.25 MB

### **Reviews**

*The best pdf i ever study. We have go through and so i am confident that i will gonna study again once again down the road. You are going to like the way the blogger compose this pdf.

## MULTI-CLASS CLASSIFICATION FOR IDENTIFYING JPEG STEGANOGRAPHY EMBEDDING METHODS (PAPERBACK)

To save **Multi-Class Classification for Identifying JPEG Steganography Embedding Methods (Paperback)** eBook, remember to access the link below and save the ebook or have access to additional information that are in conjunction with MULTI-CLASS CLASSIFICATION FOR IDENTIFYING JPEG STEGANOGRAPHY EMBEDDING METHODS (PAPERBACK) ebook.

Biblioscholar, United States, 2012. Paperback. Condition: New. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. Over 725 steganography tools are available over the Internet, each providing a method for covert transmission of secret messages. This research presents four steganalysis advancements that result in an algorithm that identifies the steganalysis tool used to embed a secret message in a JPEG image file. The algorithm includes feature generation, feature preprocessing, multi-class classification and classifier fusion. The first contribution is a new feature generation method which is based on the decomposition of discrete cosine transform (DCT) coefficients used in the JPEG image encoder. The generated features are better suited to identifying discrepancies in each area of the decomposed DCT coefficients. Second, the classification accuracy is further improved with the development of a feature ranking technique in the preprocessing stage for the kernel Fisher s discriminant (KFD) and support vector machines (SVM) classifiers in the kernel space during the training process. Third, for the KFD and SVM two-class classifiers a classification tree is designed from the kernel space to provide a multi-class classification solution for both methods. Fourth, by analyzing a set of classifiers, signature detectors, and multi-class classification methods a classifier fusion system is developed to increase the detection accuracy of identifying the embedding method used in generating the steganography images.
