Congressional Sales Office, 2002. OCLC Number: (OCoLC)51565784 Subject: Human cloning -- Moral and ethical aspects. Excerpt: . . . 11 Most scientists, according to leading scientific journals, now regard research cloning as impractical for treating patients. In the December 2001 issue of Nature, Peter Aldous (chief editor of news and features of Nature) said, The idea of thera-peutic cloning seems to be on the wane. . . most scientists now believe this will be too expensive and cumbersome for regular clinical use. In Stem Cells, (the first to isolate human embryo stem cells in 1998), Jamie Thomson of Johns Hopkins University writes, T he poor availability of human oo-cytes, the low efficiency of the nuclear transfer procedure, and the long population-doubling time of human ES cells make it difficult to envision this therapeutic cloning becoming a routine clinical procedure. And a recent New Scientist editorial states, that Ministers in Britain have too easily swallowed the line that cloning human embryos is essential to medical progress. It is not. Like stuck records, ministers and policy makers continue to en-thuse about therapeutic cloning even though the majority of bench scientists no longer think its possible or practicable to treat patients with cells derived from cloned embryos. Specific Objections and Concerns Raised by Researchers University of Colorado biologist Jonathan Van Blerkom said he supports a blanket ban on all human cloning until scientists thoroughly understand what causes the birth defects that have plagued efforts to clone other mammals, such as cows and sheep. Until you really understand the underlying biology of what..
