Excerpt from Cooperative Economic Insect Report, Vol. 9: September 4, 1959 Unusually warm and humid weather continued to cover most areas east of the Rocky Mountains this week. Several states in the northeastern and central areas have recorded the warmest August in several years. Temperatures were above seasonal levels throughout the Nation, with the exception of the Pacific Northwest, most of Texas and southern Florida. Cooler polar air covered the Northwest, while recurring widespread rain and shower activity provided some cooling in the latter areas. Largest temperature excesses extended from western New England and the Middle Atlantic States to the upper Great Plains, reaching maxima over the central Great Lakes States. The longest hot spell of the summer gradually came to an end late in the week and over the weekend in much of the midsection of the country.
