Brand New Book ***** Print on Demand *****.Excerpt from *Economics and the Community* This book has been written as an attempt to place the principles and problems of economic life in their relation to the community, in so simple a form that the study thereof might be of greater service to the citizen in the performance of civic duties. It is the purpose of the book to give what the citizen needs to know about economics rather than to explore and expound economic theory. A glance at the problems of civil society today discloses that to a large degree, economic problems are the issues which dominate elections, law making and administrative actions. In fact the great central purpose of government - the protection and welfare of the citizens - is seen to take on economic aspects when we consider and determine such questions as the prevention of civil disorder, trade abuses, exploitation, monopoly, waste of resources or when we consider the positive side in the promotion of transportation, mediums of exchange, banking, international trade or the education of producers and consumers through schools, laboratories, statistics and research. Taxation, the life principle of the state, constitutes a combined political and economic problem. Taxes must be levied to support the government, but they must not be so high as to destroy legitimate production.
