

GNSS Augmentation

By Frederic P. Miller

Alphascript Publishing. Taschenbuch. Condition: Neu. Neuware - Augmentation of a Global Navigation Satellite System is a method of improving the navigation system's attributes, such as accuracy, reliability, and availability, through the integration of external information into the calculation process. There are many such systems in place and they are generally named or described based on how the GNSS sensor receives the external information. Some systems transmit additional information about sources of error, others provide direct measurements of how much the signal was off in the past, while a third group provide additional vehicle information to be integrated in the calculation process. 68 pp. Englisch.
