

Assessment of criteria for selection of timber as building material for building construction projects within Lagos Metropolis

By Blessing Adegoke

GRIN Verlag Feb 2012, 2012. Taschenbuch. Book Condition: Neu. 210x148x2 mm. This item is printed on demand - Print on Demand Neuware - Bachelor Thesis from the year 2009 in the subject Engineering - Civil Engineering, printed single-sided, grade: 1.0, University of Lagos, language: English, abstract: Shelter is one of the basic needs of people in every society. Man strives to have decent homes and environment; this is applicable in both rural and urban communities by the use of good building materials. The earliest forms of houses were built by mud which can still be found in some areas in the country. Gradually, development and structural advancement began to take place in the world of building. As man moved from Stone Age to computer age; this was further enhanced by the growth and advent of new building materials and modern technology. As a result of changes in design, environmental decoration and taste of individuals, the old and crude methods of building productions were rendered obsolete. Hence, there is need for a holistic approach for integrating sustainability principles into material selection decision making at the design stage of building project (Akadiri, 2011). Careful selection of environmentally sustainable building materials is the...

Reviews

It is one of my personal favorite pdf. Of course, it really is play, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Nicholas Ratke**

This is the very best publication we have read through right up until now. It is one of the most incredible book we have read through. Once you begin to read the book, it is extremely difficult to leave it before concluding.
