Univ Europeenne, United States, 2012. Paperback. Condition: New. Aufl.. Language: French . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. L implication de certains genes dans la genese des cardiomyopathies (CM) comme les genes de l inflammation, de l adhesion cellulaire, du systeme immum, de la croissance cellulaire, du metabolisme des lipides et des lipoproteines, du stress oxydant, de la transcription, et du systeme renine angiotensine (SRA), constitue une etape necessaire dans la comprehension de la physiopathologie de ces maladies severes et complexes. Sur la base d etudes menees au cours de la derniere decennie, il semble probable que les polymorphismes des genes du SRA comme ECA (ID), AGT (M235T) et AT1R (A1166C) jouent un role important dans l incidence et la progression des maladies vasculaires. L identification des marqueurs genetiques influencant le developpement de la maladie et les concepts Pharmacogenomie et/ou Nutrigenomie pourront nous aider a mieux comprendre les mecanismes physiopathologiques afin de retarder la survenue des maladies auxquelles le predisposent ces genes.
