By Barry Jones

Mac Keith Press. Hardcover. Condition: New. 440 pages. Dimensions: 9.6in. x 6.8in. x 1.3in. Clinics in Developmental Medicine No. 163 Children with craniosynostosis are born with congenital deformities of the face and skull. In severe cases associated problems are common. The child who is not properly cared for can end up blind, deaf and with severe learning difficulties. In addition, they may be left with unacceptable facial deformities. Outside specialized craniofacial units, there is at present nowhere for those involved in primary or secondary care to go for help with the many practical problems that these children present. In this book, a distinguished team of editors have assembled experts in the field to introduce the non-craniofacial specialist to what can be achieved and how they can contribute to the child's welfare. It will be essential reading for paediatricians seeking practical information about the management of these disorders, and for specialists in neurosurgery, ENT, ophthalmology, plastic surgery, maxillo-facial surgery, orthodontics, psychology, genetics, anaesthesia, audiology and speech therapy. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Hardcover.
