Springer. Paperback. Book Condition: New. Paperback. 296 pages. Dimensions: 9.0in. x 6.0in. x 0.7in. This is not another collection of contributions on a traditional subject. Even more than we dared to expect during the preparatory stages, the papers in this volume prove that our thinking about science has taken a new turn and has reached a new stage. The progressive destruction of the received view has been a fascinating and healthy experience. At present, the period of destruction is over. A richer and more equilibrated analysis of a number of problems is possible and is being cruried out. In this sense, this book comes right on time. We owe a lot to the scholars of the Kuhnian period. They not only did away with obstacles, but in several respects instigated a shift in attention that changed history and philosophy of science in a irreversible way. A clearcut example - we borrow it from the paper by Risto Hilpinen - concerns the study of science as a process, and not only as a result. Moreover, they apparently reached several lasting results, e. g. , concerning the tremendous impact of theoretical conceptions on empirical data. Apart from baffling people for several decades, this...
