Excerpt: .Unless verified in the preceding manner, it will not be possible to make an accurate survey. It is to be regretted that very few of the surveying chains will, if tried in this way, be found to answer. If the chain be too long, some surveyors attempt to rectify it by taking out a few of the small rings, thus rendering the links unequal and unfit for taking offsets. Hence we see how advantageous it would be for gentlemen possessed of large estates to have a standard line, that they themselves might try the surveyors chain, and be able to judge as to the accuracy of a survey already made, or as to the propriety of making a survey with such an instrument. 105. E 2 - A Method of detecting False Balances. Although uniformity of weights and measures has in a great measure taken place throughout the kingdom, yet if the balances that are used be unequal or false, frauds of a serious nature may be practised. In order to have a balance as perfect as possible, it is necessary to attend to the following circumstances--first, the arms of the beam ought to be exactly equal in length and in weight; second, the points from which the scales are suspended should be in a right line passing through the centre of gravity of the beam; third, the friction of the beam upon the axis ought to be as little as possible; fourth, the pivots,...
