

Pediatrics Volume 5

Filesize: 7.56 MB

Reviews

This pdf will never be straightforward to get going on studying but quite enjoyable to read through. This is certainly for all those who stante there was not a really worth studying. You are going to like the way the blogger publish this publication.
(Mrs. Adah Sawayn)

Not Avail, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1898 Excerpt: . return periodically, and are usually treated by the attending physicians by hydrotherapeutic measures. As a rule the pain disappeared in a few days under this treatment and patient was again able to follow her usual vocation. Becker was called to the patient in one of these attacks and learned from the history that the pains, during which the girl threw herself around in bed for hours, returned in about four weeks, and that the child, who by no means gave the impression of being anemic, had never menstruated. A physical examination, which was permitted only after lengthy opposition, revealed total occlusion of the hymen, which felt tough, and was strongly protruded by a tense elastic tumor. He had, therefore, to deal with retained menstrual secretion in the vagina caused by atresia hymenalis. The treatment was of course very simple; a crucial incision opened the hymen and a full liter of darkbrown, semisolid blood was evacuated. After irrigating the vagina with lukewarm, water, iodoform gauze was passed in through the incision, and was removed on the following day. The patient was at once relieved, and has since then menstruated regularly, and without pain. For the Positive Diagnosis of the Bacilli of Diphtheria in the Diphtheritic Membrane. M. Neisser has discovered a procedure which enables one to make the diagnosis in a short time. The specimen is smeared on plates of grape-sugar serum agar, and these are placed for six hours in an incubator at 34-360 C....
