We are coming to understand more and more every day the germ theory, or the science of bacteriology, and to appreciate that a great deal of disease is preventable because its cause may be eradicated by the proper use of disinfectants the properties of which are fully understood. So far as the publishers are aware, however, there is at this time no concise work treating of the modern methods of disinfection which have been brought into very common usage since the introduction of formaldehyde in its various forms. To meet this want the little book which follows was suggested and the author, who had enjoyed ample opportunity for practical tests and wide observation and study of the best methods employed, was selected to prepare this volume. How well he has done...
