The flowers are of a pale lemon colour, and borne very freely, in cylindrical spikes. It forms a handsome bush, and blooms from April to June. Native of Swan River. *A. grandis*. --This plant is in habit and appearance much like *A. pukhella*, but it is larger, and the bright yellow balls of flower are also larger, and more freely produced. Native of the Swan River Colony. *A. hispidissima*. --A very desirable and showy species for spring flowering. It is a branching shrub, having the branches clothed with spreading hairs. The leaves are sessile, or nearly so, one pinnae, bearing about seven pair of oblong-obtuse, dark green leaflets. The flowers, which grow in globular heads, are produced in great profusion, generally in pairs, of a deep rich yellow. Native of Swan River, Australia. *A. linearis*. --An erect shrub, the narrow linear phyllodes...
