

## Bulletin University of New Mexico, Vol. 3: Geology of the Vicinity of Albuquerque (Classic Reprint)

By Kirk Bryan

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Bulletin University of New Mexico, Vol. 3: Geology of the Vicinity of Albuquerque The city of Albuquerque is situated in the north-central part of the Territory of New Mexico, in the valley of the Rio Grande. This paper treats of the geology of an area el miles by twelve with the city as a renter. Albuquerque is the chief city of the Territory and is the junction point of the Atchison, Topeka Santa Be and the Santa Fe coast lines. The New Mexico Central, under construction, enters the area from the east, through the Menaul School arroyo and has its terminal at Albuquerque. The Rio Grande, carrying great amounts o-and and silt, flows through the middle of the area from north to south and supplies water for irrigation to many acres of land in its immediate valley. The accompanying map gives the main cultural and geological features. The contours are taken from the U.S. Geological Survey topographical map of Albuquerque Quadrangle. The survey is not accurate as to detail both on account of the large...
