Lulu.com, United Kingdom, 2011. Paperback. Book Condition: New. 229 x 150 mm. Language: English . Brand New Book ***** Print on Demand *****. I was fortunate in having an instructor at the University of Minnesota who was looking after me, recalled one electrical engineering graduate of 1949. When I said, What s next? he said, If I were you, I d just go down the street here to Engineering Research Associates, and I d think you d like what they re doing there . That was Seymour Cray, and his computer designs helped create a notable computer industry in the Twin Cities. Another Minnesota graduate, Earl Bakken (class of 1948), founded Medtronic and the core of a nationally renowned medical devices industry. For 75 years the Institute of Technology, now the College of Science and Engineering, has pioneered in research, innovation, and technology transfer to Minnesota and the world. The people behind this unique institution are revealed in this concise illustrated history, prepared by its own team of professional historians.
