

Low-Carbon Development Opportunities for Nigeria Directions in Development

By -

World Bank Publications. Paperback. Book Condition: New. Paperback. 186 pages. Dimensions: 10.1in. x 6.9in. x 0.6in. The Federal Government of Nigeria has adopted an ambitious strategy to make the nation the world's 20th largest economy by 2020. Sustaining such a rapid pace of growth will entail an expansion of activity in many sectors, including those with high carbon emissions per unit of output. In the absence of sound policies to accompany economic growth with efforts to reduce its carbon footprint, emissions of greenhouse gases could more than double in the next two decades, with negative consequences on the local and global environment. Over the course of two years, the World Bank has worked closely with the Federal Government of Nigeria as well as with representatives of academia, the private sector, and civil society to produce the first comprehensive low-carbon development study for Nigeria. Low-Carbon Development: Opportunities for Nigeria presents the final results of that detailed analytical effort. Focused on four key sectors—agriculture and land use, oil and gas, power, and transport—the analysis shows that low-carbon development can be an attractive and viable proposition for Nigeria, not only because it would position the country as a leader in the global fight against climate...
