Developmental Assessment - Theory, Practice and Application to Neurodisability (Paperback)

By Patricia Mary Sonksen

Mac Keith Press, United Kingdom, 2016. Paperback. Condition: New. Language: English . Brand New Book. This handbook presents a new, practical and logical way of assessing development in preschool children that can be applied across the developmental spectrum. The reader is taught how to confirm whether development is typical and if it is not, is signposted to the likely nature and severity of impairments with a plan of action. The author uses numerous case vignettes from her 40 years experience to bring to life her approach with clear summary key points and helpful illustrations. * Clarifies what is being tested and the rationale behind traditional tests * Includes tables showing the ages at which 50 and 90 of children achieve a specific domain * Describes permissible assessment adaptations for children with impairments. This title will be of value to paediatricians, paediatric neurologists, developmental psychologists, health visitors, specialist nurses, speech-, occupational- and physiotherapists, ophthalmologists, orthoptists, audiologists and audiometricians at every level of experience in the care of children from 0 to 5 years.

Reviews

This publication will never be straightforward to get going on looking at but really fun to see. This can be for all those who statte that there had not been a worth looking at. You wont really feel monotony at at any moment of your own time (that's what catalogs are for about should you request me).

-- **Cale Hansen Sr.**

Simply no phrases to explain. It is definitely simplistic but shocks from the fifty percent from the pdf. You may like the way the blogger write this ebook.
