

Theory of Nonlinear Synthesis of Radiating Systems

Filesize: 6.92 MB

Reviews

Totally one of the better publication I have actually read through. It really is rally fascinating through studying time period. Its been printed in an extremely simple way and is particularly just following i finished reading through this ebook in which basically modified me, modify the way i think.

(Mrs. Maudie Weimann)

THEORY OF NONLINEAR SYNTHESIS OF RADIATING SYSTEMS

To download **Theory of Nonlinear Synthesis of Radiating Systems** eBook, make sure you access the link listed below and download the file or get access to additional information which are highly relevant to THEORY OF NONLINEAR SYNTHESIS OF RADIATING SYSTEMS ebook.

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | In this book are presented the theory and methods for solving nonlinear synthesis problems of various types of radiating systems arising during optimal design. Variational formulations of problems, in which are given only requirements to amplitude directivity pattern (DP) or DP by power, and to amplitude and phase (amplitude or phase) of distribution of excitation sources of electromagnetic fields, are given. Characteristic feature of these classes of problems is nonuniqueness and branching (or bifurcation) of existing solutions. Research and finding of optimal solutions of the synthesis problems is reduced to the study and numerical solution of nonlinear integral equations of Hammerstein type. There are given the numerical methods to solving the synthesis problems of such radiating systems: linear antennas, antenna with flat aperture, linear and planar antenna arrays (AA), microstrip arrays, adaptive AA, hybrid reflector and lens antennas and synthesis on the basis of contour DPs of fixed and variable form. This book can be used by the experts in the antennas theory, applied mathematics and mathematical physics, by students and post-graduate students of corresponding specialties. | Format: Paperback | Language/Sprache: english | 372 pp.
