Paperback Pages Number: 249 Language: Simplified Chinese Publisher: China Population Publishing House; edition (September 1. 2011). floating population in China Development Report 2011 Introduction: large-scale migration of population movements in China's industrialization and urbanization of the most significant demographic phenomena. The sixth national census data show that the number of floating population in China reached 221 million in 2010, accounting for 16.5% of the total population. The floating population management has become China's 12th Five-Year period of deepening the structural reform of key areas to ensure long-term and rapid development of the major issues of economic and social resources and the environment for the promotion of China's population and economic and social comprehensive, coordinated, sustainable development has an important strategic significance. With China's rapid economic and social development, population movement and migration has become increasingly active, and some new changes tend to. First, the flow of the total population continues to increase, the new generation of floating population has gradually become the main. The past three years, the scale of China's floating population growth rate of 10 million a year. In the next 30 years, there will be 300 million rural people into towns. Accounted for the main body of the new generation of floating population in the working-age population, those born after 1980. Second, the population continues to be gathered to the coast, along the river, along the main form of urban agglomeration development of urbanization. At present, the coastal axis of the Eurasian Continental Bridge and the axis of the Yellow River, Yangtze River axis, the axis of the Pearl River...
