Barnes Noble Classics pulls together a constellation of influencesbiographical, historical, and literaryto enrich each reader s understanding of these enduring works.On December 27, 1831, the young naturalist Charles Darwin left Plymouth Harbor aboard the HMS Beagle. For the next five years, he conducted research on plants and animals from around the globe, amassing a body of evidence that would culminate in one of the greatest discoveries in the history of mankindthe theory of evolution.Darwin presented his stunning insights in a landmark book that forever altered the way human beings view themselves and the world they live in. In The Origin of Species, he convincingly demonstrates the fact of evolution: that existing animals and plants cannot have appeared separately but must have slowly transformed from ancestral creatures. Most important, the book fully explains the mechanism that effects such a transformation: natural selection, the idea that made evolution scientifically intelligible...
