## THE ELEMENTS OF ALGEBRA AND TRIGONOMETRY

To save **The Elements of Algebra and Trigonometry** PDF, remember to click the hyperlink beneath and download the file or have accessibility to additional information that are relevant to THE ELEMENTS OF ALGEBRA AND TRIGONOMETRY book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1885 Excerpt: .requires for its demonstration higher algebra than this book introduces, that not only has every number a logarithm, but it has an infinite variety of logarithms, constructed, as the term is, on different scales or bases. The base of any system of logarithms is denned by the fact that in that system unity is its logarithm. The base in ordinary use is 10, and hence with this base  $\log 10 = 1$ . Logarithms to this base are the only ones which will now be considered in their practical use. 3. Whatever the base be, the logarithm of unity is zero. For since, by Art. 1,  $\log a + \log b = \log ab$ , let  $b = 1$  and.  $ab = a$ , .  $\log a + \log 1 = \log a$ , .  $\log 1 = 0$ . 4. Confining ourselves, as has been just premised, to 10 as the base, we have by Art. 1  $\log 100 = \log 10^2 = 2 \log 10 = 2$ ,  $\log 1000 = \log 10^3 = 3 \log 10 = 3$ ,  $\log 10000 = 4 \log 10 = 4$ , and generally, if  $n$  be any positive integer,  $\log 10^n = n$ . Again,  $\log = \log 1 - \log 10 = -\log 10$   $\log Tis = \log x \log 10 = -2$ . and generally, if  $n$  be any positive integer,  $\log -- -- . 5 10n 5$ . The same number cannot have two different logarithms to the same base 10. For if it were possible that a had two different logarithms...
