## DNA NANOBIOSENSORS

LAP Lambert Academic Publishing Aug 2016, 2016. Taschenbuch. Condition: Neu. Neuware - Due to tremendous molecular recognition potential, DNA is particularly well suited macromolecule for biosensing applications. The analysis and study of gene sequences and gene polymorphisms have a significant role in quick detection of genetic mutations, which offer reliable diagnosis even before any symptoms of a disease appears. Therefore, the detection of specific DNA sequence is important in various areas as well as clinical analysis like DNA diagnostics, gene...
