Examining fracking from the perspective of political ecology

By Lee Hooper

GRIN Verlag GmbH Okt 2013, 2013. Taschenbuch. Book Condition: Neu. 211x24x12 mm. This item is printed on demand - Print on Demand Neuware - Seminar paper from the year 2013 in the subject Ethnology / Cultural Anthropology, grade: 1, Massey University, New Zealand, language: English, abstract: Throughout the modern era, particularly with the development of new and innovative technologies, conflict has existed between the environment and those who inhabit it. With the advent of highly industrialised technology during the 20th century conflict has been on a steady increase as there are often dialectical processes involved between those creating technological innovations and those who become unwittingly involved in them. One environmental conflict called hydraulic fracturing, or fracking as it is commonly referred to, is a profitable industrial practice whereby natural gas is extracted from rock layers in the ground. Fracking is an environmental conflict arising from economic and political marginalisation based primarily on class divisions. This will be demonstrated first through describing fracking and how it is an environmental conflict, by explaining how fracking fits into a political and economic framework, and by finally outlining the cultural component, that is how marginalised socio-economic and ethnic groups are affected by the practice...
