The 12th International Conference on Medical Image Computing and Computer-Assisted Intervention, MICCAI 2009, was held in London, England at Imperial College during September 20-24, 2009. The venue was situated in one of London's best locations, adjacent to landmarks such as The Royal Albert Hall and the Science, Natural History and Victoria and Albert Museums, with Hyde Park just a short walk away. Over the last decade, the MICCAI conferences have become a premier international event, with papers of very high standard addressing the multidisciplinary fields of biomedical image computing, computer-assisted intervention and medical robotics. The conference has attracted annually leading scientists, engineers and clinicians from a wide range of disciplines. This year, we received a record submission of 804 papers from 36 different countries worldwide. These covered medical image computing (functional and diffusion image analysis, segmentation, physical and functional modelling, shape analysis, atlases and statistical models, registration, data fusion and multiscale analysis), computer-assisted interventions and robotics (planning and age guidance of interventions, simulation and training systems, clinical platforms, visualization and feedback, robotics and human robot interaction), and clinical imaging and biomarkers (computer-aided diagnosis, organ systems specific applications, molecular and optical imaging and imaging biomarkers). Reviews

This is the very best publication we have read through right up until now. It is one of the most incredible books we have read through. Once you begin to read the book, it is extremely difficult to leave it before concluding.

An extremely great ebook with perfect and lucid answers. This is certainly for anyone who states that there was not a well worth looking at. It has been designed in an exceptionally simple way and is particularly only soon after I finished reading through this ebook in which it actually transformed me, modifying the way in my opinion.
