Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Dublin Review, Vol. 21 In fact, as to classification, it is impossible properly to dispose of books: the proper subdivisions are chapters. One book ought to be placed in many classes. The Principia of Newton ought to be divided into portions severally referrible to mathematics, mechanics, mathematical astronomy, physical astronomy, optics, hydrostatics, aerostatics, c., 650. There are a great many sums in mixed money: how are they to be classified? Take each bundle to pieces, put the ten pound notes together, the five pound notes, the sovereigns, the silver, the copper. No, this is not what the advocate of the classed book-catalogue wants. Some parcels have most notes with a little silver; they must be put together: others have more copper than any thing else they must be in one subdivision, in spite of the notes and gold they contain. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
