

MCU theory and practical training of technical projects

Filesize: 2.54 MB

Reviews

Extensive manual! Its this type of great read through. This can be for all who statte there was not a worth reading. It is extremely difficult to leave it before concluding, once you begin to read the book.
(Dr. Furman Becker V)

MCU THEORY AND PRACTICAL TRAINING OF TECHNICAL PROJECTS

To download **MCU theory and practical training of technical projects** PDF, remember to refer to the web link listed below and download the file or gain access to other information which are have conjunction with MCU THEORY AND PRACTICAL TRAINING OF TECHNICAL PROJECTS ebook.

paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 300 Publisher: Electronic Industry Publishing House Pub. Date :2009-09. This book closely all kinds of microcomputer application the actual situation. in principle. to be enough for the degree. to the main line training program. focusing on theory and practice. content. Deep. fully embodies the characteristics of higher vocational education and competency-based application. highlight the innovative quality of the human ability to apply training. content-rich. practical. Describes the current widely used microcontroller engineering. From a technical and engineering application point of view. to meet the different levels and professional needs. the book introduces single-chip engineering project knowledge and use of system components. control program design and debugging. Training related to commonly used keyboard input. LED display. SRAM expansion. and LCD display. relay control. temperature control. infrared remote control. stepper motor control. DC motor control. frequency control and many other close to the technological development and practical use of technology SCM engineering projects. systematic introduction to the principles of single-chip technology and training content. Highlights the ability of engineering practice. for theory and practical training of students. curriculum design and graduate design. Contents: Unit 1 project microcomputer application system development and demonstration of understanding of the process of training requirements 1.1 1.3 1.2 Training objective knowledge of project learning environment 1mcs-51 Series MCU pins project structure and learning environment. said the number 2 single-chip approach in training of 1.4 thinking tasks and practice 1.6 1.5 step training program reporting requirements and assessment standards unit 2 singleFour Satisfaction guaranteed, or money back.
