OUTLINE OF BIOTECHNOLOGY

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Agricultural Biotechnology and Genetic Engineering | Biotechnology is an area of production and research in which biological systems and biological principles are employed to solve technological problems. Applications of herbicides, pesticides and fertilizers have greatly increased crop yields in the past. Agricultural biotechnology may likely play a key role in the race to feed the world's expanding population with fewer inputs and on less and less available land. Genetic engineering of plants represents...
