

Intergenerational Democracy: Rethinking Sustainable Development (Paperback)

Filesize: 5.03 MB

Reviews

An extremely awesome publication with lucid and perfect explanations. It is actually written in basic phrases rather than confusing. You will like how the writer publishes this book.

Common Ground Publishing, United States, 2011. Paperback. Condition: New. New.. Language: English . Brand New Book ***** Print on Demand *****. Intergenerational Democracy: Rethinking Sustainable Development, takes an intimate look at the influences underpinning human-environmental relationships, with a special focus on ethnic heritage and multi-culturalism. It describes how human-ecosystem connections have been severed and how issues such as global climate change threaten the future of mankind. This book advocates for concerted efforts to re-establish viable and sustainable Cycles of Life by proposing models that can assist this process. The foundation of these models is Intergenerational Democracy (ID), a whole-of-community method of engagement and participation that requires the inclusion of citizens representing all ages (from 8 to 100+ years). ID is embedded in the principles of direct democracy and human rights, recognizing that there are many quieter but equally legitimate voices, particularly those of children, which are rarely heard in policy and planning forums. As explained by an eleven-year-old boy, We should work to a level where children s views are regarded just as important as any adult s as we are the ones that shall be living the future. Through its age-based methodology, ID enables the application of intergenerational equity, which is at the heart of environmental sustainability. ID cuts through barriers of inequality, by engaging, connecting and motivating whole communities in planning and managing their sustainable futures. This book includes three case studies that describe the methods application and affirm the importance of capturing the voices of children, the planet s future custodians. The book stresses the importance of rebuilding environmental relationships at the local level, centred on the social and environmental identity of each place, as the basis for rethinking sustainable development.
