REMEDICATION OF FLUORIDE IN WASTE WATER

Condition: New. Publisher/Verlag: Scholar's Press | Water is the major medium of fluoride intake by humans . Fluoride in drinking water can be either beneficial or detrimental to health, depending on its concentration. The presence of fluoride in drinking water within permissible limits is beneficial in the calcification of dental enamel.The world's fluoride stores in the ground are estimated to 85 million tons. Out of which nearly 12 million tons are located in India. The most common fluorine-bearing minerals, which...
