## DRIVEN: HOW HUMAN NATURE SHAPES OUR CHOICES

Audible Studios on Brilliance, 2015. CD-Audio. Condition: New. Unabridged. Language: English . Brand New. In this astonishing, provocative, and solidly researched book, two Harvard Business School professors synthesize 200 years of thought along with the latest research drawn from the biological and social sciences to propose a new theory, a unified synthesis of human nature. Paul Lawrence and Nitin Nohria have studied the way people behave in that most fascinating arena of human behavior the workplace and from their work they produce a book that examines the four separate and distinct emotive drives that guide human behavior and influence the choices people make: the drives to acquire, bond, learn, and defend. They ultimately show that, just as advances in information technology have spurred the New Economy in the last quarter of the 20th century, current advances in biology will be the key to understanding humans and organizations in the new millennium.
