By Lick Observatory

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1904 Excerpt: .lines are fainter, and many of them have companions. The region from A 4800 to A 5600 of the iron spectrum was photographed with three prisms. It was found that there were several lines in this region which had no companions, and which could be used without hesitation. Close double lines were assumed to have positions depending upon the relative intensities of their components. The plates were measured with one of the measuring microscopes in use for the regular line of sight work. Each plate was measured with both violet left and violet right in the eye piece. A plate of the sky was taken with a very long slit and the amount of the curvature of the comparison lines was determined in the same manner as by Campbell. The curvature corrections were found to be insignificant. June JO July so Aug. 19 Sept it Oct...

Reviews

Totally one of the best publication I have got ever go through. It really is packed with knowledge and wisdom I discovered this pdf from my dad and i recommended this book to discover.

-- **Madisyn Kuhlman**

This pdf can be worthy of a read, and much better than other. I am quite late in start reading this one, but better then never. Its been printed in an remarkably easy way which is merely following i finished reading this book by which basically changed me, alter the way i think.
