Changing by Design: Organizational Innovation at Hewlett-Packard

By Deone Zell

ILR Press. Paperback. Condition: New. 192 pages. Dimensions: 9.0in. x 6.0in. x 0.6in. How do corporations achieve change In the first analytic book about Hewlett-Packard, Deone Zell also offers an ethnography of corporate redesign, documenting Hewlett-Packard's radical reorganization of both a manufacturing and a research division. Because she writes from within the process as it unfolds, Zell is able to demonstrate how the inclusion of employees in every step of redesign can inspire the knowledge and commitment to transform an organization. Hewlett-Packard is among a growing number of companies in the United States exploring what is called sociotechnical systems (STS) redesign. As competitive pressures have grown, interest in STS has increased because it has the potential to catalyze comprehensive organizational change and avoid the pitfalls of a piecemeal or small-scale approach. STS works from the ground up, involving front-line employees in analysis and redesign of the entire organization and in explicit examination of an organization's culture. In Hewlett-Packard's California Personal Computer Division, production operators worked alongside managers to redesign their printed circuit assembly line into self-managing teams of employees. In the Santa Clara Division, a very different workforce of engineers, initially unwilling to standardize their creativity, had to develop commercial applications...
