RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1971 Excerpt: . . . proposals or other conceptions of needs or desires of people Can economic factors be used in the decision making process to control location and direction of development of space for Mans needs Since the rise of plant and animal life on this planet, species have developed, flourished and died. Urbanization threatens irreversible changes in flora and fauna or other changes considered detrimental to the quality of the environment. How can undesirable trends be halted or reversed In economic terms, if it is to the benefit of the public that certain biosystems be maintained in present or improved condition without further encroachment or change, what is the publics responsibility for monetary and other losses to the owners of lands and areas involved and how are these costs to be levied One example of the problems that face us in our interactions with the natural environment may be drawn from the wetlands of...
