Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Babcock s Book for Inventors; An Explanatory Statement and Guide for Clients and Others Interested in U. S: And Foreign Patents, Trade Marks, Copyrights and Similar Exclusive Privileges To obtain I t valuable patent protection for an invention the application must be carefully and conscientiously prepared by an able and competent attorney of long and varied experience in all branches of patent law and patent office practice - that is, by a man who has made a specialty of patent law and practice for a number of years. Preparing and prosecuting patent applications before the patent offices, and preparing and prosecuting suits in the courts to defend patents, is all law and requires a thorough and special legal training. No man should attempt such a task unless fully prepared. He should have first a thorough training in general law, and then a special training in all of the special law and statutes relating to patents. With such a foundation he is ready for the first early years of his practice. He should be quick to grasp ideas and able to make fine distinctions, and capable of preparing and presenting his arguments in a compelling and convincing manner. Add to this, many years experience in practice before the patent offices of Canada, the United States and all foreign countries, and many years practice before the courts, in patent cases, and vou will have an attorney amply qualified to obtain for an inventor the fullest possible protection to which he is entitled.
