Forgotten Books, 2018. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Carcinogenesis Abstracts, 1979, Vol. 17: A Monthly Publication Sponsored by the National Cancer Institute Nutritional factors in the etiology of coronary heart disease, maturity-onset diabetes, diverticular disease, and dental caries are discussed. The possibility that nutrition plays a role in the etiology of malignant large bowel tumors and other diseases is also noted. Recommendations for a prudent diet are outlined. Complex carbohydrates, especially whole grain cereals and unprocessed fruits and vegetables, should be increased at the expense of fats, simple sugars, and refined carbohydrates. In addition, as much as possible of the daily intake of fat should be in the polyunsaturated form. (24 refs) About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
