

Introduction to modern biological engineering and technology (general education materials) Biotechnology Biotechnology Series

By ZHANG YONG KUI // LAN XIAN QIU

paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 224 Publisher: Chemical Pub. Date :2011-07-01 version 1 2011-07-01 1st printing. Zhang Yongkui. blue autumn the first editor of the Introduction to modern biological engineering and technology tightly around the modern bio-engineering and technology the basic theory. principles. technology and research and development and production process for the preparation of application. bio-engineering disciplines focused engineering and technical disciplines and professional characteristics. Part of the book according to the characteristics of the bio-engineering disciplines including genetic engineering. enzyme protein engineering. cell engineering. biochemical engineering and fermentation engineering. the basic content of the separation. re-building is divided into upper. middle and lower reaches of three parts. namely: upstream bio-engineering and technology base. focusing on cells. genes. proteins and basic knowledge of engineering and technical base; River for industrial biological processes. focusing on the industrial production of biological products; downstream of the separation of biochemical engineering. introduced the separation and purification of biochemical products. Contents: Chapter 1 Introduction 1.1.1 1.1.2 bioengineering meaning 2.1.3 Overview of Bio-engineering bio-engineering genetic engineering research content 3.1.3.1 3.1.3.2 4.1.3.3 enzyme...
