

Mathematical Questions and Solutions in Continuation of the Mathematical Columns of The Educational Times Volume 36

Filesize: 6.94 MB

Reviews

This book will not be straightforward to start on studying but really fun to read. it absolutely was writtern really flawlessly and helpful. You can expect to like just how the writer write this publication.

(Glenna Goldner)

MATHEMATICAL QUESTIONS AND SOLUTIONS IN CONTINUATION OF THE MATHEMATICAL COLUMNS OF THE EDUCATIONAL TIMES VOLUME 36

DOWNLOAD

Not Avail, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1881 Excerpt: .is given in my Notes on Roulettes and Glisettes. Another solution is given in Reprint, Vol. XXXIII., p. 67. 6766. (By Professor Cayley, F.E.S.)--Find the stationary and double tangents of the curve $4x^2 + y^2 + z^2 = 0$. 5527. (By W. S. B. Woolhouse, F.R.A.S.)--Determine, by a simple construction, the size of the equilateral triangle from or into which a triangle can be orthogonally projected. Solution by C. Leudesdorf, M.A. Let ABC be a triangle, G its centre of gravity; and let BC be bisected at D and trisected at E; join G to B, D, E, C. In order to project ABC into an equilateral triangle, it will be sufficient to project so that BGE, DGC both become right angles. Draw with centres D and E two circles, each of radius DE, and through G and the points where these circles cut, draw a third circle cutting BC in P and Q. Then GP, GQ, are the right-angled pair of the involution of which GB, GE; GD, GE are pairs; so that, if a transversal be drawn parallel either to GP or GQ, as 41032 in the figure, the point O will be the centre of the involution on 12, 34, and therefore semicircles described on 12, 34 as diameters, on the side nearer to G, will cut OG in the same point g. Taking g as the orthogonal plane projection of G, and the transversal as the axis, the projection of any point is at...
