Treating Childhood Psychopathology and Developmental Disabilities fills this need by summarizing and critiquing evidence-based treatment methods for pediatric patients from infancy through adolescence. After a concise history of evidence-based treatment, promising new trends, and legal/ethical issues involved in working with young people, well-known professors, practitioners, and researchers present the latest data in key areas of interest, including: (1) Cognitive-behavioral therapy and applied behavior analysis. (2) The effects of parenting in treatment outcomes. (3) Interventions for major childhood pathologies, including ADHD, PTSD, phobias, anxiety, depression, bipolar disorder, and conduct disorder.
