Not illustrated. 1804 Excerpt: .and the two adjacent angles to find the length of two equal sides, contiguous to the givenside, when the area of the trapezium is a given quantity. VII. Quest. 46. By W. Lenhart, York-Town, Penn. In a plane rectilineal triangle, if from one of the angles adjacent to the base a straight line be drawn perpendicular to the opposite side, then shall the rectangle contained by the side.on which the perpendicular falls, and the part intercepted between the vertical angle and the perpendicular, be equal to the difference of the squares of the straight line drawt. from the vertical angle to the middle of the base and the semi-base; required a demonstration. VIII. Quest. 47. By James North, Philadelphia. A hole was made in a vessel filled with wine, and, at the same instant, a supply of water was contrived to keep the vessel constantly full:...
