CLOCK GENERATOR CIRCUITS FOR LOW-POWER HETEROGENEOUS MULTIPROCESSOR SYSTEMS-ON-CHIP

Tudpress Verlag Der Wissenschaften Gmbh Aug 2013, 2013. Taschenbuch. Condition: Neu. Neuware - Heterogeneous multiprocessor systems-on-chip (MPSoCs) are key components of modern electronic systems. Future MPSoCs feature a globally asynchronous locally synchronous (GALS) clocking architecture and advanced power management functionality, as for example fine-grained ultra-fast dynamic voltage and frequency scaling (DVFS). Data is transmitted between system cores using high-speed serial links within a packet based network-on-chip (NoC). In this work concepts and circuits for local clock generation in heterogeneous GALS...

Reviews

This book is fantastic. It really is packed with wisdom and knowledge I am pleased to explain how this is the greatest ebook i actually have go through in my personal daily life and can be he greatest ebook for at any time.

-- **Mr. Zachariah O'Hara**

Completely essential go through ebook. it absolutely was writtern quite properly and useful. Your way of life span will likely be enhance the instant you total looking at this publication.

-- **Norma Dooley**
