Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from **Trees, Vol. 2: A Handbook of Forest-Botany for the Woodlands and the Laboratory** The leaf is the most plastic of all the organs of the plant, and it is by no means sufficient for the Forest student to know the mere shapes of ordinary leaves he Ought to be familiar with the principal varieties, and especially with the metamorphoses which leaves undergo, and it is hardly too much to say that he who really understands the conformation and adaptations of the leaf, holds the key to the morphology of the higher plants. It is for this reason that I have entered into some matters which may at first sight appear foreign to the purpose of the work as a whole.
