Fundamentals of Laser Interactions II

By Ehlotzky, Fritz

Condition: New. Publisher/Verlag: Springer, Berlin | Proceedings of the Fourth Meeting on Laser Phenomena Held at the Bundessportheim in Obergurgl, Austria, 26 February 4 March 1989 | At this Obergurgl seminar, theoreticians and experimentalists discussed recent developments in laser interactions. This volume contains the texts of invited lectures and abstracts of contributed papers. The main topics discussed are: multiphoton ionization above-threshold ionization collisions in strong fields atoms in intense fields chaos in radiative interactions electron correlations in multiphoton processes Rydberg atoms in external fields other laser interactions. Thus a broad and up-to-date account of laser interactions is given which will be of interest to scientists, engineers and graduate students. | Resonance multiphoton ionization under strong fields.- On the Problem of the "New" structure in multiphoton ionization introduced by short-pulse high intensity lasers.- Resonant multiphoton ionization of xenon and atomic hydrogen in intense sub-ps-laser pulses.- Multiphoton detachment from negative ions.- Multiphoton processes in intense laser fields.- Harmonic generation in rare gases at high laser intensity.- Ionization of atoms by an intense Co₂ laser.- Studies of strong-field effects in multiphoton subpicosecond excited plasmas: Soft X-ray fluorescence and propagation.- Theoretical aspects of multiphoton ionization and harmonic generation.- Eigenchannel r-matrix calculation of photoionisation processes...

Reviews

Simply no phrases to clarify. It is really basic but surprises from the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Mr. Noah Cummerata IV**

This publication might be well worth a read, and much better than other. It really is simplified but excitement inside the 50 % of the book. You will not feel monotony at whenever you want of the time (that's what catalogues are for concerning when you check with me).

-- **Imogene Bergstrom**
