Brand New Book ***** Print on Demand *****.Excerpt from Annual of the Universal Medical Sciences, 1888, Vol. 5: A Yearly Report of the Progress of the General Sanitary Sciences Throughout the World The influences properly comprehended under the term climatology are atmospheric, telluric, and cosmic, latitude, altitude, distance from the ocean, and prevailing winds arc the chief elements of geographic climate. There is, however, no uniform understanding among physicians as to which are properly climatic characteristics, or merely vicissitudinal occurrences. Paludal malarial infection. being remedial by drainage, is contested by some not to be a proper attribute of the climate of a locality. The genius of man can undoubtedly bring about the changes upon the face of nature which will make the marsh no longer the home of the malarial germ. The effects of climate are not to be looked for in the prevalence of specific diseases with well-defined geographic limits. Main of the diseases attributed to climate have been due to local insanitary causes. What climate chiefly does is to establish constitutional tendencies through molecular modifications which become permanent and morbitic if its...
