Excerpt from Old Finding: An Introduction to the Geological Study of Petroleum The author points out that the foundation of the successful petroleum enterprise must be laid by the geologist rather than by the engineer, and he states that the present work has been written for geologists, and especially for young geologists but it may be added that, to a large extent, the views expressed are couched in language so free from technicalities that the work may be studied with profit by a far wider circle, including, in fact, all those who are interested in the petroleum industry, either in an administrative capacity, or as investors.
