SOL-GEL COMPOSITE TRANSDUCERS: A WEIGHT PERCENT STUDY

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Applications for non-destructive evaluation (NDE) and structural health monitoring (SHM) in principle can be performed at various temperatures provided the transducer can reliably operate under those conditions. This work presents a weight percent study of PZT-Bismuth Titanate composite transducers fabricated through a sol-gel spray-on method to show how different compositions can be used under different monitoring conditions. The two main sections to this work are the theoretical modeling of a composite transducer...

Reviews

A brand new e book with an all new point of view. I have got read and i am sure that i am going to likely to read through once more once more in the future. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Ms. Teagan Osinski III**

The very best pdf i possibly study. It generally will not expense excessive. You wont really feel monotony at anytime of the time (that's what catalogs are for concerning should you ask me).
