# DIRECT SPATIOTEMPORAL INTERPOLATION OF RESERVOIR FLOW RESPONSES

VDM Verlag Jan 2010, 2010. Taschenbuch. Book Condition: Neu. 220x150x5 mm. Neuware - The traditional reservoir modeling workflow consists of first developing a reservoir model, performing flow simulation on that model, verifying the model by performing history matching and finally using the history matched model to make predictions of future performance. In contrast, this work demonstrates two quick approaches to directly analyze the spatio-temporal variations of dynamic responses such as pressure and well flowrates and perform interpolation. Both these techniques...
