about DNA testing for predisposition to diseases or for deep maternal and paternal ancestry when
written records are absent. At home-genetic testing needs watchdogs, Web sites, and guidebooks to
interpret test results in plain language for those with no science background. Online, you ll find
genetic tests for ancestry or for familial (genetic, inherited) disease risks. What helpful suggestions
do general consumers with no science background need to consider? What s new in medical
marketing is genetic testing online for predisposition to diseases—such as breast cancer or blood
conditions. Kits usually are sent directly to the consumer who returns a mouthwash or swab DNA
sample by mail. What type of training do healthcare teams need in order to interpret the results of
these tests to consumers? Once you receive the results of online genetic testing kits, how do you
interpret it? If your personal physician isn t yet trained to interpret the results of online genetic tests,
how can you find a healthcare professional that is trained?.
