Reviews

This publication will never be straightforward to get going on looking at but really fun to see. This can be for all those who statte that there had not been a worth looking at. You wont really feel monotony at at any moment of your own time (that's what catalogs are for about should you request me).

Forgotten Books. Paperback. Condition: New. This item is printed on demand. Dimensions: 9.0in. x 6.0in. x 1.3in. Excerpt from Proceedings of the Royal Society of London, Vol. 81: Series A, Containing Papers of a Mathematical and Physical Character If i is comparatively feeble, and therefore R small compared with R_0 , this equation makes proportional to and since 72 . Is not very different from 1 for red light, the change of resistance is roughly proportional to the fourth root of the intensity. A peculiarity of my seleno-aluminium bridges which must be mentioned is this: after the bridge has been in use for a considerable time (perhaps some months) its resistance for high voltages is extremely unsteady. Thus, a bridge which had been much used had a perfectly steady behaviour with 2 volts, but with 6 volts the spot on the scale moved with great suddenness over large distances, the bridge being all the time in the dark.
